

To whom it may concern, I have been an XM Radio Subscriber (read as PAYING consumer) for over a year now and feel that the product they provide is a tribute to our free enterprise system. I would respectfully urge the FCC to reject the NAB's petition 04-160 regarding XM Radio's right to broadcast their version of Instant Traffic and Weather to major markets. It is unfortunate that organizations such as the NAB lack the ingenuity and intestinal fortitude to buckle down and compete for market share such as XM has decided to do and would resort to such tactics as attempting to simply eliminate honest competition via government legislation. A vote for petition 04-160 is a vote against the very platform that has encouraged Americans to be the forward thinking and world leading society that it has been, and hopefully will be allowed to remain through the wise decisions of government agencies when presented with a time wasting petition as the above mentioned. Thank You for allowing me to voice my concerns.
